Cut two 3 x 8 1/2 pieces of card stock & score both pieces at 2" from each end, fold on score lines. Cut one 3 x 6 1/2 piece of card stock & score at 1" from each end, fold on score lines.

Decide which piece will be the front. Take your 1 3/8" Circle punch, slide it in all the way, center it from side to side and punch

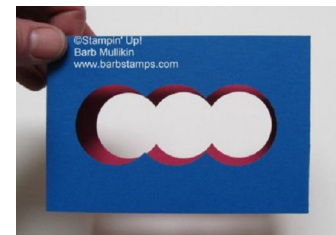

Slide the punch over to the right folded edge and punch again. Repeat on the left folded edge.

This is the front of your card.

Do the same thing to the shorter piece using the smaller 1 1/4" punch. This will be the middle panel of your card.

This is the view when the front and middle panels are glued together.

Stamp and embellish all three panels before assembly. Glue the panels together by using this photo as a guide. I used the Multipurpose Adhesive so I had some wiggling time to get the placement just right.
