Creative Inspiration www.barbstamps.com

1. Fold each end to the middle.

2. Open the prongs of a brad

3. Place the prongs of the brad over the center of the ribbon.

4. Stuff all the ribbon to the head of the brad and close the prongs.

5. Punch a hole in your project, insert the brad and open the prongs on the backside to secure

6. Trim the ends and finish your project. I attached mine to a frame from the Peekaboo Frames Big Shot die that was stamped with the Netting Background stamp
