

## 3D Box Card

5 ½ x 12 Textured Card Stock  
 3 ¾ x 5 ¼ Designer Series Paper layer

Score your card stock at 4, 7 ½, 8 and 11 ½  
 Place Sticky Strip on the last 1/2 " close to the fold line.

Decorate the front as desired

Fold on all score lines and punch a window near the top of the last panel. Remove Sticky Strip backing on ½" strip and assemble your card. Using the same punch, stamp a greeting and punch out. Apply Multipurpose Liquid Glue to the punched out greeting and drop it in the window. Since the glue is liquid, you can use a bone folder or paper piercer to wiggle it around and get it in the right spot.
