

## Creating Rows of Pierced Circles

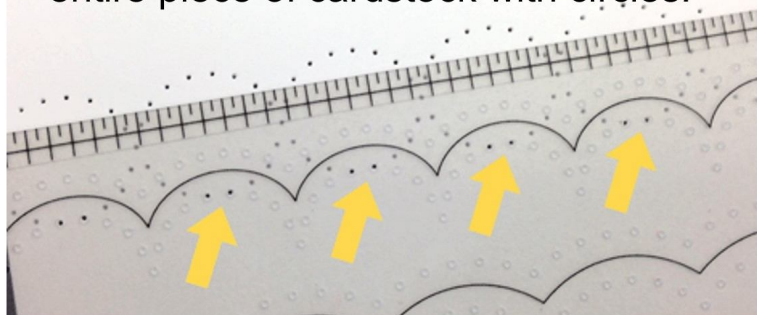

Draw a line down the center of your cardstock with a pencil, then line up the holes at the tips of the scallop along the line and pierce the scallop.

Rotate your paper 180 degrees and line up the scallop on the template with the pierced scallop on your paper. Pierce the scallop to complete the circles.

Line up the pierced holes with the template as shown and pierce the scallop to start the next row of circles. Rotate your paper 180 degrees and line up the template as shown in the top right. Repeat these steps until you've filled the entire piece of cardstock with circles.

Your card stock should look like this when you're done. Erase your pencil line and attach it to a card base; embellish your project as desired.

You can order the Essentials Paper Piercing Pack #126187 and Paper-Piercing Tool #126189 in my Online Store at [www.shoppingwithbarb.com](http://www.shoppingwithbarb.com)
